Address: \_\_\_\_\_

City: \_\_\_\_\_ State: \_\_\_\_\_ Zip: \_\_\_\_\_

Emergency Contact Name: \_\_\_\_\_

Phone: \_\_\_\_\_

This form is designed to give information needed to make an informed choice of whether or not to undergo a “Permanent Makeup” application. If you have questions, please don’t hesitate to ask.

I, \_\_\_\_\_ am over 18, am not under the influence of drugs or alcohol and desire to receive the indicated permanent cosmetic procedure. The general nature of cosmetic tattooing as well as the specific procedure to be performed has been explained to me.

Although “Permanent Makeup” is affective in most cases, no guarantee can be made that a specific client will benefit from the procedure.

The “Permanent Makeup” is the process of inserting pigment into the dermal layer of the skin and is a form of tattooing.

All instruments that enter the skin or come in contact with body fluids are sealed or sterilized before use and disposed of after use. Cross contamination guidelines are stickily adhered to.

**I agree to accompany my practitioner to the emergency room in the event that they were to be accidentally stuck with my needle and take a blood test for their safety and disclose all test results to my practitioner.**

Generally, the results are excellent. However, a perfect result is not a realistic expectation. It is usual to expect a touch-up after the healing is completed. Color change or loss: As the procedure area heals the color will lighten and sometimes seems to disappear. This can all be addressed during the touch up appointment and is why the touch up is necessary. The procedure area has to be completely healed before we can address any concerns. This takes a few weeks. Initially the color will appear much more vibrant or darker compared to the end result. Usually within 5-7 days the color will fade 40-70%, soften and look more natural. The pigment is permanent but will fade somewhat over time and will likely need to be touched-up within 12 months to 2 years.

- I absolutely understand and accept that such procedure is a process, often requiring multiple applications of color to achieve desirable results; and 100% success cannot be guaranteed.
- I understand that the color selection and color results in all procedures are NOT an exact science.
- I understand that this procedure will fade and this fading can alter the original pigment color and that this determines that it is a time for a touch-up visit.
- I understand that implanted pigment color can slightly change or fade over time due to circumstances beyond your control and I will need to maintain the color with future applications and a touch up session within 60 days.
- I accept the responsibility to explain to my technician any desires for specific color, shape, and/or position for any procedure done today.
- I acknowledge that the proposed procedure(s) involve risks inherent in the procedure and have the possibilities of complications during and/or following the procedures such as swelling, temporary bleeding, bruising, redness, infection, allergic reaction, misplacement, pigmentation, poor color retention and hyper-pigmentation, fanning or fading of pigments.
- I understand the actual color of the pigment may be modified slightly, due to the tone and color of my skin. I fully understand this is a tattoo process and therefore not an exact science, but an art.
- I understand that I will have the opportunity, within the time constraints of my appointment, to approve the design and color of the semi-permanent makeup to be applied, and I accept responsibility for same.
- Depending on the procedure(s) I select, I accept responsibility for determining the shape and position of eyebrows, eyeliners, lipliner, and/or full lip color. My practitioner will do their best to work with what I have.

- I understand that if I have any skin treatments, laser hair removal, plastic surgery or other skin altering procedures, it may result in adverse changes to my permanent cosmetics. I acknowledge some of these potential adverse changes may not be correctable.
- **Cold Sores** are common experience after Lip Blushing as this treatment could be a trigger to outbreak. In most cases cold sore outbreak could happen to those clients, who previously had cold sore. However, there are some cases, when cold sore appeared after treatment with those clients, who never had it before.

Client is responsible for taking preventive actions:

For clients, who experienced cold sores before, we recommend consulting with doctor and taking preventive medicine in advance before procedure (doctor gives strict instructions).

For clients, who never experienced cold sores before, it is optional. However, it is always better to take medicine and prevent possibility of outbreak.

- I understand that sun, tanning beds, pools, some skin care products and medications can affect my permanent makeup.
- If I have previously had micropigmentation performed by another Artist/Organization on the same area (brows, lips, etc) that I am asking PMU Artist to work on today, I understand that correcting or touching up micropigmentation that was performed by others involves additional risks because of the existence of permanent pigments of unknown composition, brand, color, age, shape and other factors over which PMU Artist has no control. I understand that additional appointments after the initial and follow up appointments may be required, and will be billed at PMU Artist standard rates. I understand that PMU Artist cannot predict the results in advance and cannot guarantee and has not represented that the results will be as I desire. I understand and fully accept the risks associated with this procedure and hold PMU Artist harmless from same.

## **Acceptance**

- I have read and understand these risks listed above and they have been explained to me. The alternative to these possibilities is to use cosmetics and not undergo the Permanent Make Up procedure(s).
- I certify that the information in the above questionnaire is accurate and my questions have been answered.
- I give my permission to proceed with the procedure(s).

### ***Cancellation Policy***

Micropigmentation is a time-intensive service. In booking your appointment, we are reserving a designated amount of time specifically for you. We require a \$150 deposit for initial treatment and 50\$ deposit for a touch up in order to reserve this time for your appointment. If you need to cancel for any reason, we require that you cancel at least 48 hours prior to the start of your appointment time so that we may be able to offer this time to another client. If your appointment is cancelled with less than 48 hours' (without doctor's report) your deposit will not be refunded.

### ***Right to Refuse Treatment***

Though it is extremely rare, we reserve the right to refuse treatment for the following reasons:

- Undisclosed skin condition (including sunburn/suntan)
- Under the influence of drugs or alcohol
- Any behavior which, in the opinion of the artist might compromise the artist's or ability to work safely and comfortably toward the desired results, or might disrupt other clients.

### ***Possible Risks, Hazards or Complications***

**Pain:** There can be pain even after the topical anesthetic has been used. Anesthetics work better on some people than others. Topical anesthetics are used to numb the area to be tattooed. Lidocaine, Prilocaine, Benzocaine, Tetracaine and Epinephrine in a cream or gel form are typically used. If you are allergic to any of these please inform me now.

**Infection:** Infection is very unusual. The areas treated must be kept clean, an only freshly cleaned hands should touch the areas.

**Uneven Pigmentation:** This can result from poor healing, infection, bleeding or many other causes. Your follow up appointment will likely correct any uneven appearance.

**Asymmetry:** Every effort will be made to avoid asymmetry but our faces are not symmetrical so adjustments may be needed during the follow up session to correct any unevenness.

**Excessive Swelling or Bruising:** Some people bruise and swell more than others. Ice packs may help and the bruising and swelling typically disappears with 1-5 days. Some people don't bruise or swell at all.

**Fever Blisters:** If you are prone to cold sores or fever blisters, (herpes simplex), there is a high probability that you will get them. It is advised that you call your doctor for a prescription antiviral to help prevent this from occurring.

**To Avoid Unforeseen Complications, Please Answer the Following Questions**

	Yes	No		Yes	No
Are you OVER 18?			Are you allergic to any metal?		
Have you had any aspirin or blood thinners in the past week?			Have you ever had any semi-permanent makeup procedures before?		
Any mood-altering drugs within the last 8 hours?			Are you on any immunosuppressive medications such anti-inflammatories or steroids?		
Do you have a history of cold sores, herpes, or fever blisters?			Are you allergic to topical antibiotic preparations or desensitizers?		

Are you sensitive/allergic to latex?			Is there any history of skin diseases or remarkable skin sensitivities?		
Have you had a chemical peel or laser? If so, when? _____			Are you currently taking any Vitamins A or E in any form?		
Do you have problems healing?			Are you pregnant or nursing?		
Are you currently undergoing radiation or chemotherapy?			Are you required to take antibiotics during dental or invasive medical procedures?		
Are you currently using any Retin-A or alpha-hydroxy skin care products?			Do you wear contact lenses? (if Yes, I understand they must be removed during my eyeliner procedure and should not be replaced until the next day)		
Previous problems with tattoos or have your physician advised you not to have a tattoo at this time?			Are you allergic to bee stings?		
Have you had any BOTOX or fillers?			Are you allergic to Aloe vera?		
Are you currently being treated by a dermatologist?			Are you allergic to any anesthetics (lidocaine or any other "caines")?

***COVID-19 Liability Release Waiver***

The World Health Organization has declared the novel Coronavirus (COVID-19) a worldwide pandemic. Due to its capacity to transmit from person-to-person through respiratory droplets, the government has set recommendations, guidelines, and some prohibitions.

**In consideration of my participation in the foregoing, the undersigned acknowledge and agree to the following:**

- I have not experienced symptoms that of fever, fatigue, difficulty in breathing or dry cough or exhibiting any other symptoms relating to COVID-19 or any communicable disease within the last 14 days.
- I have not, nor any member(s) of my household, traveled by sea or by air, internationally within the past 14 days.
- I did not, nor any member(s) of my household, visit any area within the United States that was reported to be highly affected by COVID-19, in the last 30 days.
- I have not been, nor any member(s) of my household, diagnosed to be infected of COVID-19 virus within the last 30 days.

**Following the pronouncements above I hereby declare the following:**

\_\_\_\_\_ I am fully and personally responsible for my own safety and actions while and during my participation and I recognize that I may be in any case be at risk of contracting COVID-19.

\_\_\_\_\_ I agree to indemnify, defend and hold harmless the Organization from and any and all costs, expenses, damages, lawsuits and/or liabilities or claims arising whether directly or indirectly from or related to any and all claims made by or against any of the released party due to injury, loss or death from or related to COVID-19

By signing below I acknowledge that I have read the foregoing Liability Release Waiver and understand its contents; that I am at least eighteen (18) years old and fully competent to give my consent; That I have been sufficiently informed of the risks involved and give my voluntary consent in signing it as my own free act and deed; that I give my voluntary consent in signing this Liability Release Waiver as my own free act and deed with full intention to be bound by the same, and free from any inducement or representation. This waiver will remain effective until laws and mandates relevant to COVID-19 are lifted.

***AFTER CARE FOR YOUR PERMANENT MAKE-UP PROCEDURE***

	<b>EYEBROWS / CORRECTIONS</b>	<b>LIPS</b>	<b>EYELINERS</b>
<b>WHAT TO EXPECT</b>	Slight swelling with varying degrees of redness. Fairer complexions tend to be more red.	Day of the procedure: swelling may occur. An ice bag covered with a paper towel can be applied for the first	Various degrees of swelling may occur, generally for first few mornings. Sleep propped up or on your

		day and the next morning. Lips tend to be very dry.	back to reduce swelling.
<b>HOW TO CARE FOR YOUR PERMANENT MAKE UP</b>	<p><b>Day of the procedure:</b> Pat <i>lightly</i> to remove any fluid with disinfecting tissues in 1 and 2 hours after treatment.</p> <p><b>Day 2-7:</b> Keep your brows dry. Apply a <i>small amount</i> of ointment once a day before going to bed.</p>	<p><b>Day of the procedure:</b> Pat <i>lightly</i> to remove any fluid with disinfecting tissues in 1 and 2 hours after treatment. Keep moist using Q-tip with ointment for 14 days.</p> <p><b>Day 2:</b> Wash lips with mild soap and water using fingertips. Rinse and pat <i>lightly</i> to dry. Apply thin layer of ointment.</p> <p><b>Day 3-6:</b> Repeat washing and reapply ointment. Peeling will occur. <b>DO NOT PEEL OFF!</b></p>	<p><b>Day of procedure &amp; Day 2:</b> Pat your eyes with disinfecting solution every 2 hours. Apply nothing.</p> <p><b>Day 3:</b> Apply nothing. No need to wash unless lashes are stuck together.</p> <p><b>Day 4-6:</b> Apply nothing. Allow your eyeliner to dry heal. Should be no need to wash until healed. Then, resume regular routine.</p>
<b>WHAT TO AVOID</b>	<p><b>Avoid</b> placing your face directly into a shower and avoid: night creams, Retin-A, soaps, facial cleansers, on pigmented area.</p> <p><b>Avoid</b> picking or scratching</p>	<p><b>Avoid</b> extended wear lipsticks or plumping lip gloss.</p> <p><b>Avoid</b> teeth bleaching for a minimum of 3 weeks.</p>	<p><b>Avoid:</b> eye creams, Latisse &amp; flashy growth products, moisturizers, Retin-A, lash tinting, lash extensions and false lashes for <b>2-wks</b> following procedures.</p>

	eyebrows while healing.		<b>Avoid</b> high sodium foods (for at least the first 3 days).
<b>WHAT TO NOTICE</b>	Infections are extremely rare, however, if red ring appears around your brows, seek medical attention. Brows may weep for first few days so <i>change your pillowcase, nightly</i> . At first sign of infection please consult your physician.	Lips may weep first few days, <i>change your pillowcase, nightly</i> . Lips tend to fade 60% and color can hide for a 4-week period before resurfacing. At first sign of infection please consult your physician.	<b>YOUR EYEBALL SHOULD NOT BECOME RED!</b> You must seek medical attention <i>immediately</i> if you see signs of bloodshot eyes or out in the corners of your eye(s). This may be an infection requiring a physician and prescribed medication.

**FOR ALL PROCEDURES:** *A Touch-Up procedure is required in 4-6 weeks after initial procedure.*

- *Avoid make up, Retin-A and glycol acids on pigmented areas while healing.*
- *Avoid touching with fingers, sunscreens, direct sun, tanning beds and self-tanners on pigmented areas. Once healed, use a good sunscreen daily.*
  - *Avoid swimming pools, oceans, hot tubs, saunas and hot steamy showers. Shower with back to shower head to avoid water, shampoo/conditioner getting into pigmented area.*
  - *Avoid dirt (as in gardening), extreme perspiration (the gym) for the first week to prevent possible infection.*
  - *Don't be alarmed if pigment comes off onto Q-tip when applying aftercare ointments.*
  - *Don't be alarmed by fading after the first application. Final color can not be judge until 2 weeks post procedure.*
  - *Never use topical antibiotics unless given to you at time of your procedure, with specific instructions.*
  - *If planning a chemical peel, MRI, or other medical procedure, please notify technician you have iron-oxide cosmetic tattoo.*

- *If planning to have laser hair removal on upper lip or a Photo Facial using IPL, notify laser specialist of cosmetic tattoo so the area may be avoided by the laser. Both ablative and non-ablative lasers may cause pigment to turn black.*

### ***POST PROCEDURE INSTRUCTIONS***

The color of your permanent makeup procedure will be 50% darker immediately after the treatment. Do not worry it will start to get lighter between 4-10 days this is perfectly normal and the true healed color will take about 4-6 weeks to come through. In some cases, it can look like the permanent makeup pigment color has disappeared which is due to the healing layers of the skin obscuring the color temporarily. At this point, you just have to let it develop and certainly do not have any further permanent cosmetics work carried out during the 4- 6 weeks period. Your skin will be temporarily sensitized after the treatment and you should adhere to the following instructions for the next seven (7) days. This will help avoid infection and will allow time for the skin to recover.

- If you apply makeup during the 7 days following the treatment, you do so at your own risk.
- Healing will take up to four weeks and it is perfectly normal for the treated area to scab. These scabs will fall off within a few days.
- It is normal for the color to fade during the two weeks following the treatment. During the post treatment period, please try to avoid the following:
  - Spicy and salty food
  - Kissing
  - Using soaps, cleansers, creams or makeup on the treated area.
  - Facial treatments, waxing and using any form of bleach.
  - Any abrasive products, rough towels or similar.
- **DO NOT TOUCH or PICK** the small scabs that may appear after the treatments. Let them slough off naturally, otherwise you may disrupt the pigment retention.
- Taking hot baths, saunas, steam, swimming pools, salt water, and any direct shower spray on the treated area. If area does get wet, just pat dry with a Kleenex.
- Sunbathing, and tanning beds.

- Should an infection occur, seek medical attention  
Aftercare procedures have been explained to me in detail and I have read the instructions given on this sheet. I read, understood and a copy of post procedure instructions were given to me for reference.
- **FOR LIPS ONLY: Use Vaseline to keep the tattoo protected while it heals and to soothe any discomfort such as itching or dryness. Avoid applying lip balms, lipstick, or other lip products during this time. DO NOT APPLY VASELINE TO EYELINER TATTOO.**
- **AVOID touching any tattooed area with your hands. Apply all recommended products with Q-tips ONLY. If the area must be touched with hands, make sure you thoroughly wash your hands before and after touching the tattooed area.**
- **Day 3-4: When the scab starts to appear, do not wipe- only dab until dry; you must be gentle! Do not pull off the scabs prematurely.**
- **Week 2 or 3: After the procedure is completely healed, you may go back to your regular cleansing and makeup routine. Avoid scrubbing the area. Use sun block after the procedure area is healed to protect from sun fading.**

*What will make your eyebrows fade?*

Oily skin - hairstrokes will both fade and blur over time

Sun exposure - the sun bleaches everything

Certain medications

Anti-aging skincare products

Acne medications and cream
